Client, Dragon's Den

Dragon's Den

We are making **inspirational** MR prototypes
for **underprivileged youth ages 10-13**
to experience faraway environments
in an **adventure therapy** space.

Our client **needs...**

MR + Ropes Course

For Afterschool & Visitors

Highlight Architecture

New Environments

Prototype 1

- Choir loft platform
- Quest 3 MR

Spatial Challenges

Challenges we face when trying to find a playspace inside dragon's den

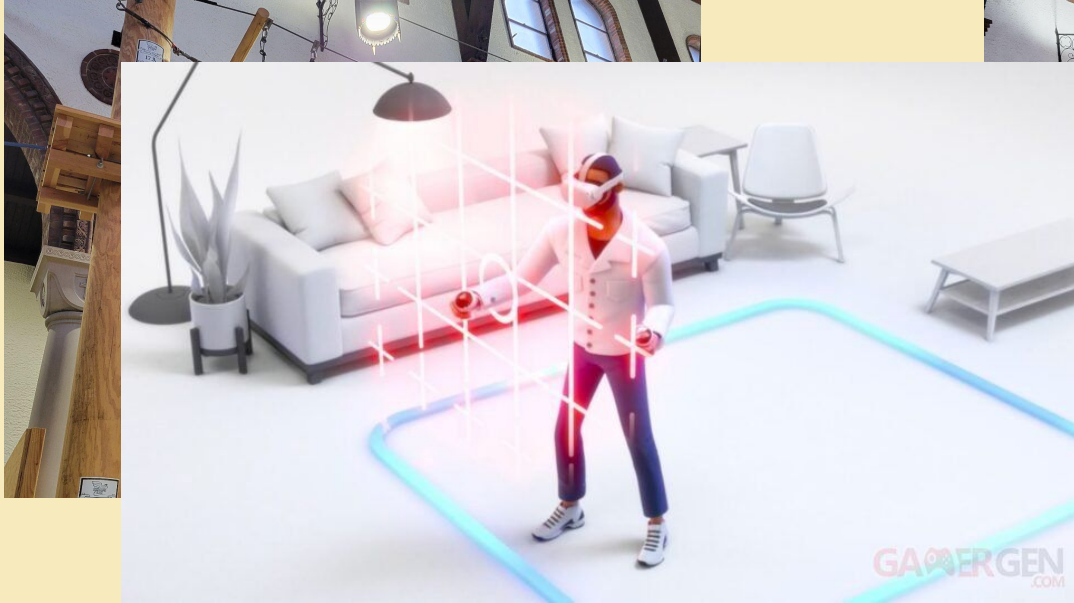

Spatial Challenges

Challenges we face when trying to find a playspace inside dragon's den

Spatial Challenges

Challenges we face when trying to find a playspace inside dragon's den

No flat area
Obstacles within boundary
Scale too big

Malfunction or dead Battery = Blindfolded

Design

The choir loft Platform

Waiting queue that bores the experience

Only part on the ropes course that works with Quest 3

Design

Experience:

After ropes-course, before zipline

Feed dragon

Story:

Flying church

Adventure around fantasyland
-replayability

progress as we discuss more with our Client

Virtual Windows

Environmental Art

Character Design

Character Modelling

Character Modelling

Test rig before topology

Dragon topology
(parts)

Slingshot Mechanic

Harvest tropical fruit

Snap to slingshot, shoot

Receive feedback

Playtests

- Showed demos at Dragon's Den
- Playtested with Hampton Middle School students ages 12-13

FEEDBACK

- Real and virtual spaces blend well
- Cute dragon

- Clear goal and visual feedback
- Use hand tracking

Next Steps

- Test Quest 3 on zipline
- More potential spaces for prototypes

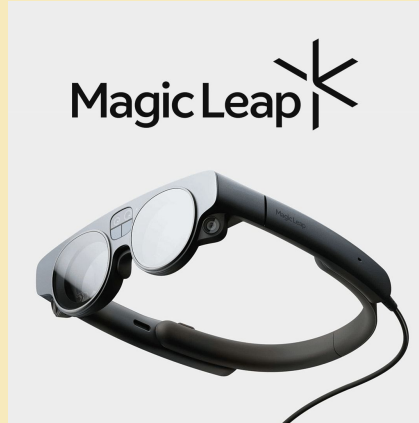

Exploring Technology

For ON the ropes course ?

Hololens 2

Xreal Light

Xreal air

RayNeo

RayNeo X2
Wireless Smart AR Glasses

Ring

Exploring Technology

For ON the ropes course...

Hololens 2
Xreal Light

No boundary limit

Stable spatial anchoring

Obstacles Tracking

Transparent screen

Exploring Technology

For ON the ropes course...

Expensive
Heavy
Not compatible with helmets

VS

Cheap
Lightweight
Compatible with other gears

We are making **inspiring** mixed reality prototypes for **underprivileged youth ages 10-13** to experience faraway environments in an **adventure therapy** space.

zipline queue - minigame

2 min

Quest 3

ropes course - experiment

XREAL Light

on the ground - roomscale game

5 min

Quest 3

Next Steps

Test Quest 3 on zipline

Design for lower course

Quest 3 & XREAL Light
